

# FAA.gov IA Overview - Research Discovery and Issues

November 19, 2014

Federal Aviation  
Administration

# Overview

- **Introduction & IA Basics**
- **FAA Site Evolution**
- **Analysis**
- **Site Structure**

# What is Information Architecture

- The **structural design of shared information environments**; the art and science of **organizing and labeling websites, intranets, online communities** and **software** to support **usability** and **findability**.
- Structural design of the information space to facilitate intuitive access to content (jesse james garret)
- Information architecture involves investigation, analysis, design and implementation.

# Key Principles to Follow

- **Use the 80/20 rule** (focus the majority of your effort (80%) on the most important 20% of the information.)
- Always **support user success**
- Users care about **what they want, not what you want**
- Users **don't tend** to want to “**explore**”
- When in doubt – **simple is better than complex**
- Provide **useful** information.
- **The more specific, the more useful.** give users information they require in order to act, right then and there.
- Make sure people **know what your page will do for them** – every page should have a clear, concise purpose
- **Identify and remove R.O.T.** Redundant, Outdated or Trivial content – delete it!
- Avoid “Word Pollution.”
- Files (pdf, doc, etc.) should not to be considered “content” when you are creating your pages.

# FAA SITE EVOLUTION

Quick Jump

ABOUT THE FAA

[ADMINISTRATION](#) (AAD) provides FAA organizations with the collective ability to acquire, account for and maintain the resources necessary to meet the FAA mission requirements.

AVIATION SAFETY  
INFORMATION

[AIRPORTS](#) (ARP) provides leadership in planning and developing a safe and efficient national airports system.

HOW DO I ...?

[AIR TRAFFIC SERVICES](#) (ATS) ensures safety, efficient operation, and maintenance, of the air transportation system.

NEWS AND  
INFORMATION

[COMMERCIAL SPACE](#) (AST) regulates and promotes the commercial space and transportation industries.

CENTERS AND REGIONS

[REGULATION AND CERTIFICATION](#) (AVR) Group, promotes the highest safety standards in the world and provides quality service to the public.

FAA-SUPPORTED SITES

[RESEARCH AND ACQUISITIONS](#) (ARA) provides guidance relating to acquisition policy, research, system prototyping, and information resource management.

OTHER AVIATION SITES

[THE OFFICE OF SYSTEM SAFETY](#) provides access to aviation safety-related databases, safety reports and publications, and information on the Global Analysis Information Network (GAIN) project..

Federal Aviation  
Administration

# 1998

**PLEASE NOTE: FAA Internet Services will be down for maintenance Sunday December 13 starting at 6:00PM EST for up to 4 Hours. A log entry of the exact times of outage will be posted to an [Outage Page](#).**

[OFFICE OF PUBLIC AFFAIRS](#) (APA) communicates to the media and FAA employees information on agency policies, programs, and plans.

[REGULATION AND CERTIFICATION](#) (AVR) promotes the highest safety standards in the world and provides quality service to the public.

[AIRPORTS](#) (ARP) provides leadership in planning and developing a safe and efficient national airports system.

[AIR TRAFFIC SERVICES](#) (ATS) ensures safety, efficient operation, and maintenance, of the air transportation system.

[FAA REGIONAL OFFICES AND AERONAUTICAL CENTER SITEMAP](#) (ARC)

[COMMERCIAL SPACE TRANSPORTATION](#) (AST) regulates and promotes the commercial space and transportation industries.

[CIVIL AVIATION SECURITY](#) (ACS) The FAA's aviation security mission is to protect the users of commercial air transportation against terrorist and other criminal acts.

[RESEARCH AND ACQUISITIONS](#) (ARA) provides guidance relating to acquisition policy, research, system prototyping, and information resource management.

[OFFICE OF DISPUTE RESOLUTION FOR ACQUISITION](#) (ODRA) provides fair and efficient resolution of procurement protests and contract disputes.

[THE OFFICE OF SYSTEM SAFETY](#) (ASY) provides access to aviation safety-related databases, safety reports and publications, and information on the Global Analysis Information Network (GAIN) project.

[FREE FLIGHT PHASE 1](#) (AOZ) is the industry-endorsed strategy that calls for the limited deployment of selected low risk technologies that will provide early benefits to users by the close of 2002.

# ANALYSIS OF CURRENT SITE

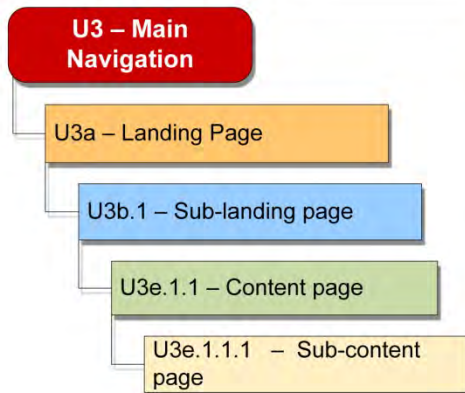

# Existing IA broken

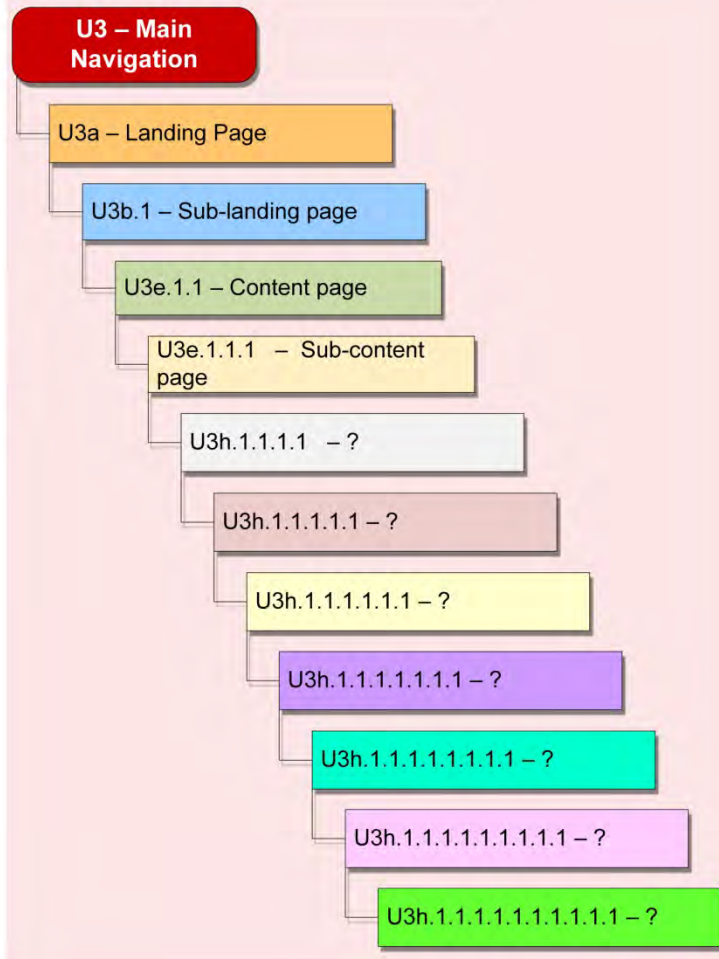

# Result: content seeks new levels

- Intended for five levels, it's stretched as far as twelve

How the site is designed

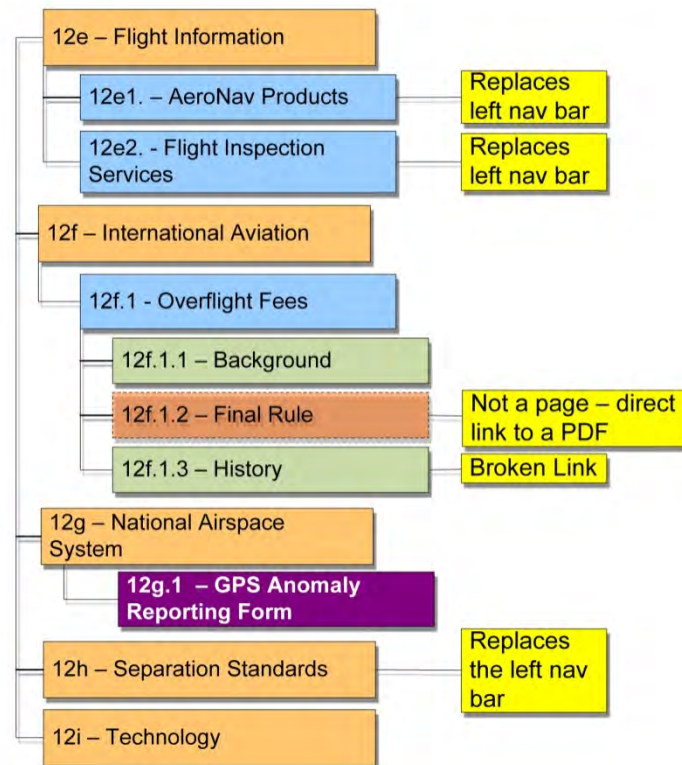

How the site is used

# Result: Unpredictable Navigation

- **Non-standard navigation causes usability and search problems**

Exceptions occur randomly, without pattern

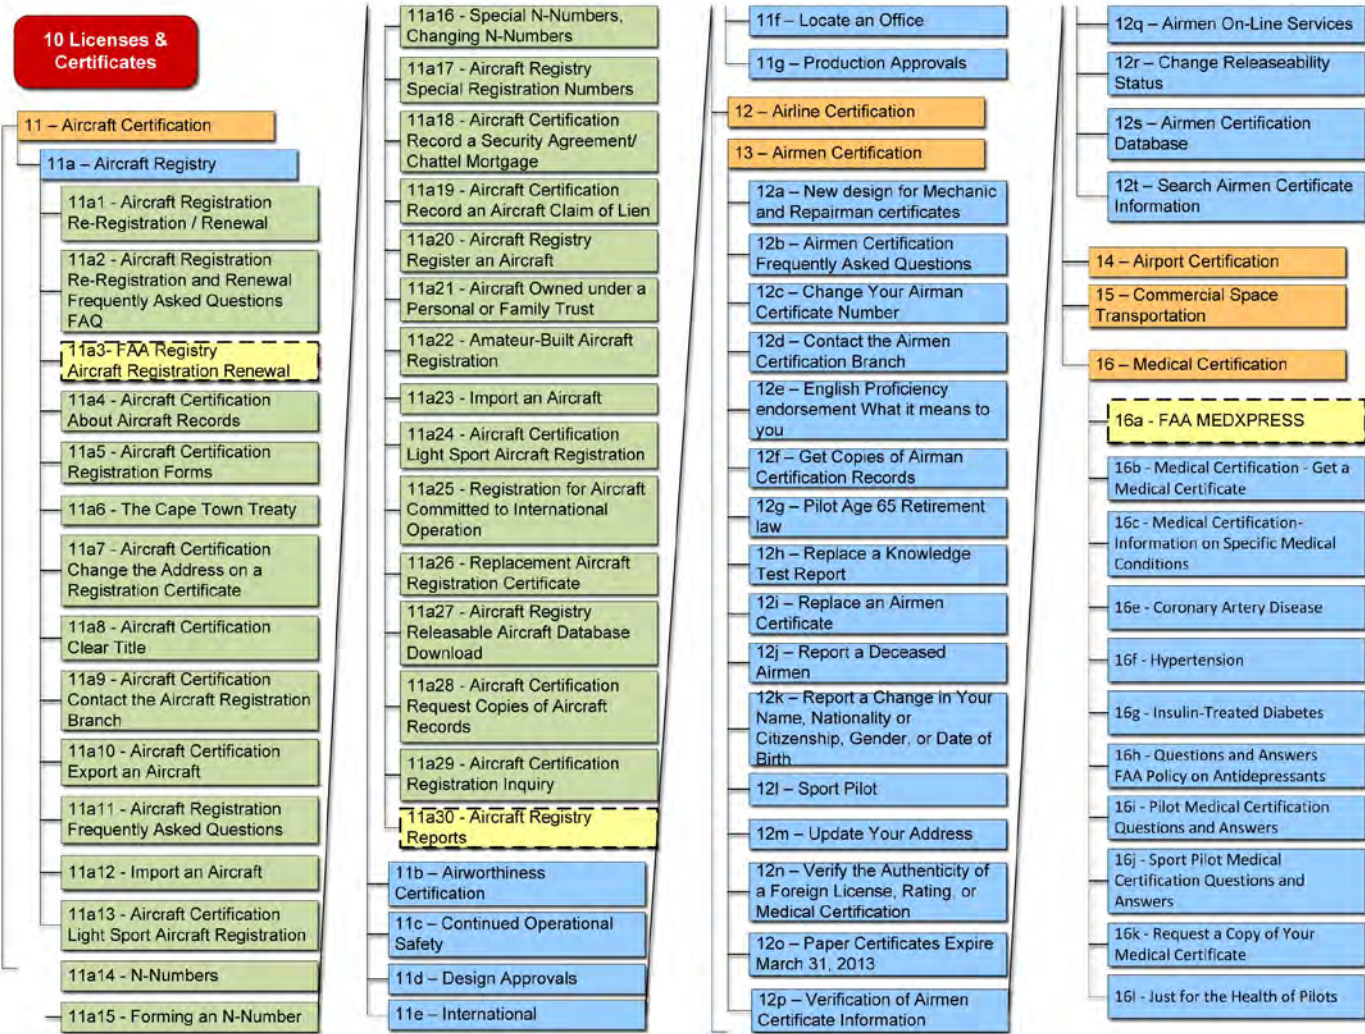

# “Hidden” pages

## Visible navigation

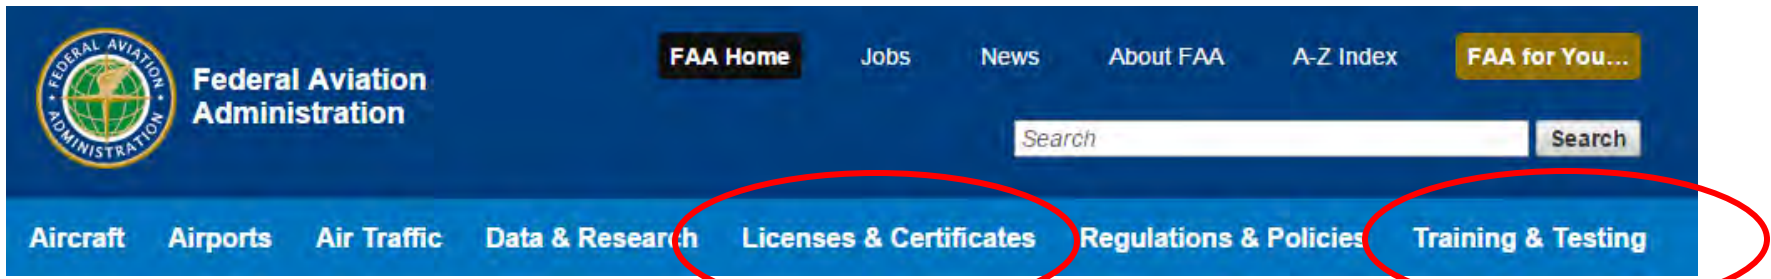

## Actual content

# Reduce Ambiguity in Navigation

Ambiguous relationship to other topics

Consolidate content focused on individuals

# Summary of challenges

- Broken IA
  - Site already can't contain content as designed, it will only get worse
  - No strategic ability to use site for communication (NextGen example)
  - All subsequent issues are likely the result of the limitation of the IA
- Stretching five level design to twelve levels & Hiding pages
  - The content currently in levels six-twelve will need to be accounted for in custom code, on a case-by-case basis
  - Makes a simple site profoundly complex
- Inconsistent navigation behavior
  - Isn't natively supported by content management systems
  - It's ineffective

# SITE STRUCTURE CONCEPTS

# Site

The screenshot shows the Federal Aviation Administration website. The header features the FAA logo, the text "Federal Aviation Administration", and navigation links: "FAA Home", "Jobs", "News", "About FAA", "A-Z Index", and "FAA for You...". A search bar is located below these links. The main navigation menu includes: "Aircraft", "Airports", "Air Traffic", "Data & Research", "Licenses & Certificates", "Regulations & Policies", and "Training & Testing".

The main content area features a large image of an airplane in flight. To the right of the image is a news article titled "FAA Updates Guidance on Air Industry Employee Reporting" with a sub-headline "September 8 – The FAA updates guidance on the Aviation Safety Action Program (ASAP) for air carrier and repair station employees." Below the article is a "Regulations and Guidelines" section with a list of links: "Advisory Circulars", "Airworthiness Directives (AD) – Current Only", "Federal Aviation Regulations (FAR)", "Forms", "Orders & Notices", "Recent Rulemaking Documents", and "Temporary Flight Restrictions (TFR)".

On the right side of the page, there are two utility sections: "Look Up N-Numbers" with an input field for "N-number" and a "Go" button, and "Check Airport Status and Delays" with an input field for "Airport Code" and a "Go" button. Below these are four status indicators: "Airport Closures" (0), "Ground Stoppages" (1), "Ground Delays" (0), and "Arrival/Departure" (1).

The Windows taskbar at the bottom shows icons for Internet Explorer, Firefox, Chrome, and other applications.

The site is how all elements function together – roughly stated when a user “adds” all the visible parts together it “equals” FAA (more specifically it equals the “story” FAA wants to tell)

NOTE: The footer is included in this concept

# Segment

The screenshot shows the FAA website's 'Aircraft' segment page. The page is titled 'Aircraft' and is part of the 'Federal Aviation Administration' website. The main navigation bar includes links for 'Aircraft', 'Airports', 'Air Traffic', 'Data & Research', 'Licenses & Certificates', 'Regulations & Policies', and 'Training & Testing'. The 'Aircraft' link is highlighted with a red box. The page content includes a search bar, a 'Print' button, and a 'Share' button. The main heading is 'Aircraft', followed by a paragraph explaining that certification of aircraft by the FAA ensures that commercial and general aviation aircraft meet the highest safety standards. Below this, there are sections for 'Registration & Certification' and 'Forms'. The 'Registration & Certification' section includes links for 'Aircraft Registration', 'Look up an N-number', 'Airworthiness Certification', 'Aviation Safety Draft Documents Open for Comment', and 'FAA Order 8900.1, Vol. 4'. The 'Forms' section includes links for 'Form 8130-3, Authorized Release Certificate, Airworthiness Approval Tag', 'Order 8130.21, Procedures for Completion and Use of FAA Form 8130-3', and 'Form 8130-6, Application for US Airworthiness Certificate'. A 'Top Tasks' section lists 'Get Form 337, Major Repair and Alteration', 'Register an aircraft', 'Look up an N-number', 'Review preliminary accident data', 'Find aircraft safety alerts', and 'Search for SAIBs'. A 'FAA Mobile' banner is also visible at the bottom right of the page.

The Segment is a high-level content “bucket”

Segments should be mutually exclusive to aid decision making

All segments added together equal FAA

# Section

First Responder Safety at a Small Aircraft or Helicopter Accident

As small aircraft and helicopters have become more complex, technology has provided systems that have enhanced operational safety. In the event of an accident, many of these systems have presented additional hazards to first responders or any potential rescuer at an aircraft accident scene. The FAA, in cooperation with [General Aviation Manufacturers Association \(GAMA\)](#), various manufacturers and first responder professional organizations, has developed training for safety at an aircraft accident scene. While the material was initially developed for firefighters, Emergency Medical Services (EMS) and police, it provides useful information for any persons that may come across an aircraft accident. Flash Player is required to view each module.

**Module 1: Systems and Material Hazards**

- Recommended for firefighters and EMS.

*Primary module that identifies hazards unique to aircraft accidents.*

**Top Tasks**

- Register your light sport aircraft
- Find information on small airplanes
- Get amateur-built aircraft reference materials
